STANISLAV BELIAEV

Machine Learning Engineer/Researcher

@ stasbelyaev96@gmail.com +1 (669) 288-1023 Mountain View, CA linkedin.com/in/stasbel github.com/stasbel

RELEVANT EXPERIENCE

Software Engineer Intern

Google

Aug. 2019 – Present Mountain View, CA

- Working as part of the Google Accelerated Science (**GAS**) team in **Google Research**.
- Exploring new approaches for **Semi-Supervised Classification** and **Representation Learning** tasks run on the internal dataset of biological samples of Malaria disease.

Deep Learning Research Intern

Nvidia

May 2019 – Aug. 2019 Santa Clara, CA

- Working as part of the **Deep Learning Applications** team.
- Developed high-level **Deep Learning framework**, built on top of **PyTorch** with seamless multi-GPU support, mixed precision mode and whole bunch of other features.
- Developed and implemented a novel model for **Speech Recognition**, which incorporates the usage of prior knowledge for speeding-up train time and boosting accuracy (see Paper 1).

Machine Learning Engineer

Neuromation

Mar. 2018 – Feb. 2019 Saint-Petersburg, RU

- Contributed major part in developing a framework for **Domain Adaptation** task and proposed new extensions to existing methods, resulting in a published paper (see Paper 2).
- Took part in various research and product-oriented projects, including: **Drug Discovery** (with Insilico, see Paper 3), **Domain Adaptation**, **Face Recognition** and **Object Detection** of garbage for pollution reducing.

Software Engineer Intern

Jet Brains

Jun. 2017 – Sep. 2017 Saint-Petersburg, RU

- Developed internal system for source code submissions clustering, finding similarities and smart tips for learning process, based on **Representation Learning** for trees.

PAPERS

1. <Paper on Speech Recognition task as a result of Nvidia internship>. Pre-print, 2019.
2. Beliaev et. al. Unsupervised Domain Adaptation: a Comparative Study and Source Entropy Maximization for Reverse Gradient Models. Pre-print, 2018.
3. Molecular Sets (MOSES): A benchmarking platform for molecular generation models. Published, 2018.

SKILLS

PLs	**Python**, C/C++, Bash, Java, Kotlin, Scala, R, Scala
Technologies	Git, Linux, SQL, GDB, **Docker**, **PyTorch**, **Tensorflow**, Spark
Interests	**Computer Vision**, NLP, **Generative Models**, RL, Big Data
Papers notes	`https://github.com/stasbel/papers`
Languages	Russian (Native), **English (Advanced)**

EDUCATION

Master of Machine Learning and Data Analysis

National Research University Higher School of Economics

Sep. 2018 – Present

Bachelor of Computer Science

Saint-Petersburg National Research Academic University

Sep. 2014 – Jun. 2018

Irregular Student

Yandex School of Data Science

Sep. 2018 - Present

Attender

Summer School on Bayesian Methods in Deep Learning by HSE's Research Group

Aug. 2017, Aug. 2018

NOTABLE PROJECTS

Molecular Sets (MOSES): A benchmarking platform for molecular generation models

- `https://github.com/molecularsets/moses`, **200+** stars, **40+** forks
- Implemented several popular **molecular generation** models, along with full train/test pipeline and overall project structure

Gadget

- `https://github.com/stasbel/gadget`, **PyPi-package** for Python3.5+
- Tool for configs parsing with getters on steroids and nice interface for readability

Searching with prior information

- `https://github.com/stasbel/articlix`
- **Information Retrieval** project related to studying the impact of prior knowledge
- Final Report. Supervised by Markov I..

EVENTS

Hackathons won:

EPAM DS Hackaton
AlphaBank Hackaton
AiHack Hackaton
MunHack Hackaton

TALKS

Presentations given:

Stepik Task
Stepik Result
IR Project
Bachelor Thesis
Text generation
SDVAE for structures
Deep Image Prior
DNN with Box Convs
